

INCIDENT RESPONSE AND SOC TRAINING SERVICES

Provide your security team with the skills they need to confidently protect your enterprise

CHALLENGE

The cyber threat landscape is expanding at a rapid pace and becoming more complex with every minute, causing security teams to burn out from chasing countless alerts and increasing their susceptibility to an attack. Organizations must focus on the threats that matter most and build a security team that can effectively limit and contain those threats without hesitation.

Security leaders who are responsible for reducing business risk and breach impact will significantly benefit from investing in not only their team's know-how and practical capabilities, but also their confidence to be combat-ready.

SERVICE OVERVIEW

Sygnia Incident Response and SOC Training Services help organizations upskill their in-house capabilities to effectively prevent, detect, investigate, and respond to evolving cyber attacks in IT and OT environments. Training is designed and delivered by frontline senior responders who provide lessons that incorporate methodologies used in modern, real-world investigations giving cyber defenders an advantage over today's sophisticated threat actors.

Our lesson plans are aligned to the tools and procedures used by your organization and come with various delivery options to create a customized training plan that fits your team's needs and objectives.

APPROACH

Our training services give security teams a deep understanding of today's cyber threats and provide them with readiness skills to utilize the right tools and procedures that quickly eliminate the adversary and mitigate disruption of your business operations.

The course methodologies are based on current, real-world attacker behaviors, motivations, and TTPs seen firsthand on the frontlines. Courses impersonate actual threat actor modes of operation, not hypothetical, and potentially misleading scenarios or textbook examples.

Sygnia gives students a familiar jumping off point, tailoring each course to fit your environment's existing technology stack and documented procedures, enabling faster adoption of improved methods.

TRAINERS

Courses are designed by global frontline experts who deliver real-world learnings to organizations of all sizes based on their response efforts to complex cyber incidents in IT and OT environments for over a decade.

Rooted in a defender heritage, our instructors possess deep expertise in training security teams on evolving and disruptive attack types including insider, ransomware, and advanced state-sponsored threats.

COURSE DELIVERY

Organizations can choose from various courses developed by incident responders, spanning topics including forensic investigation, threat hunting, cloud defense and response, state sponsored attacks, and more. [Download the catalogue](#) for course descriptions.

Sygnia offers flexible delivery methods to fit the needs of your team's size and availability:

Instructor-led

On-site guided workshops

Remote, web-based sessions

Sygnia offers a range of session formats to meet each organization's needs:

Focused exercises

Live simulations

Knowledge sharing

Guided threat hunts

Hands-on blue teaming

Hands-on purple teaming

KEY BENEFITS:

For security leaders:

Give your BOD peace of mind in their security team's ability to protect the business and reduce risk

Prepare your future security strategies and resource requests wisely

Align your strategic plans with skilled talent to support business growth

Assess your security team's skill sets against actual breach scenarios

Customize the right training plan to fit your business needs

For security practitioners:

Build confidence in your ability to properly defend without hesitation

Receive best practices from frontline experts in a guided, structured manner

Adopt Sygnia response methodologies drawn from real-world scenarios

Train within the custom framework of your existing tools and procedures

Learn common attack techniques used by threat actors and successful remediation tactics used by responders
